Department of Mechanical Engineering
Syllabus
of
Bachelor of Technology
Production & Industrial Engineering

From III to VIII Semester

Effective from Academic session 18-19
For students admitted in session 2017-18

University Teaching Departments
Rajasthan Technical University, Kota

3PIU1: ADVANCED ENGINEERING MATHEMATICS -1

B.Tech. (P&I) 3rd semester
3L+1T

UNIT	CONTENTS	CONTACT HOURS
I	Laplace Transform: Definition and existence of Laplace transform, properties and formulae, unit step function, Dirac Delta function, Heaviside function, inverse Laplace transform, Convolution theorem, application of Laplace transform to ordinary differential equation, solution of integral equations.	10
II	Fourier Transforms: Fourier Complex, Sine and Cosine transform, properties and formulae, inverse Fourier transforms, Convolution theorem, application of Fourier transforms to partial ordinary differential equation (One dimensional heat and wave equations).	9
III	Z-Transform: Definition, properties and formulae, Convolution theorem, inverse Z-transform, application of Z-transform to difference equation.	7
IV	Numerical Analysis: Interpolation, difference operators- forward, backward, central, shift and average operators, Newton's forward and backward interpolation formulae, Gauss's forward and backward interpolation formulae, Stirling's formula, Lagrange interpolation formula for unequal intervals. Inverse interpolation.	7
V	Numerical differentiation by Newton's, Gauss's and Stirling's formula. Numerical integration: Trapezoidal Rule, Simpson's 1/3 and 3/8 Rule. Numerical solution of ODE of first order: Picard's method, Euler's method, Modified Euler's method, Runge-Kutta fourth order method, Milne's Method.	7
TOTAL		40

TEXT BOOK	
1.	<i>Advanced Engineering Mathematics</i> , Jain and Iyengar, Narosa Publications.
2.	<i>Engineering Mathematics for semesters III and IV</i> , C.B. Gupta, McGraw Hill Education, India.
3.	<i>Advanced Engineering Mathematics</i> , Denis Zill and Warren Wright, Jones & Bartlett India Private Limited.
4.	<i>Advanced Engineering Mathematics</i> , O'neil, Cengage Learning, India.
REFERENCE BOOKS	
1.	<i>Advanced Engineering Mathematics</i> , Irvin Kreyszig, Wiley, India.
2.	<i>Advanced Engineering Mathematics</i> , M. Greenberg, Pearson Education, India.
3.	<i>Advance Engineering Mathematics</i> , Potter, Oxford, India.
4.	<i>Engineering Mathematics</i> , Pal and Bhunia, Oxford, India.
5.	<i>Higher Engineering Mathematics</i> , B. V. Ramana, McGraw Hill Education, India.
6.	<i>Numerical Methods for Scientific & Engineering Computation</i> , Jain and Iyengar, Jain, New Age International Publication, India.
7.	<i>A First Course in Numerical Methods</i> , Uri M Asher and Chen Greif, SIAM Publication, India.
8.	<i>Introductory Methods of Numerical Analysis</i> , S. S. Sastry, PHI Learning, India.
9.	<i>Numerical Methods for Engineers</i> , Chapra, McGraw Hill Education, India.
10.	<i>Engineering Mathematics</i> , Paras Ram, CBS Publisher, India.

3PIU2: ENGINEERING THERMODYNAMICS

B.Tech. (P&I) 3rd semester
3L+1T

Unit	Contents	Contact Hours
I	Basic Concepts and definitions of Thermodynamics: System, Surroundings, Property, Energy, Thermodynamic Equilibrium, Process, work and modes of work.	2
	Zeroth and First Law of Thermodynamics: Zeroth of Thermodynamics, Temperature scale, First law of thermodynamics, First law analysis of some elementary processes. Steady and unsteady flow energy equations.	5
II	Second Law of Thermodynamics: Heat engine, Heat pump and refrigerator, Second law of thermodynamics, Equivalence of the Kelvin-Plank and Clausius statements. Reversible and Irreversible Processes, Carnot engine, Efficiency of a Carnot engine, Carnot principle, thermodynamic temperature scale, Clausius Inequality.	4
	Entropy: Entropy, Calculation of Entropy change, Principle of entropy increase. Temperature-Entropy diagram, Second law analysis of a control volume.	3
	Availability: Available energy, Loss in available energy, Availability Function, Irreversibility.	3
III	Thermodynamic Properties of Fluids: Pure substance, Concept of Phase, Graphical representation of p-v-T data, Properties of steam. Steam tables, Mollier chart	4
	Ideal Gas and Real Gas: Ideal gas, Real gas, Internal energy, enthalpy and specific heats of an ideal gas, equations of state, Dalton's law of partial pressures, Gibbs Dalton law, Thermodynamic properties of gas mixtures.	4
IV	Thermodynamic Relations: Thermodynamic variables, Independent and dependent variables, Maxwell's thermodynamic relations, Thermodynamic relations involving entropy, Thermodynamic relations involving enthalpy and internal energy, Joule-Thomson coefficient, Clapeyron equation.	4
	Power Cycles: Otto cycle, Diesel cycle, Dual cycle, Brayton cycle & Ericsson cycle.	5
V	Vapour power cycle: Rankine cycle, effect of operating conditions on its efficiency, properties of ideal working fluid in vapour power cycle	3
	Reheat cycle, regenerative cycle, bleeding extraction cycle, feed water heating co-generation cycle.	3
TOTAL		40

3PIU3: MECHANICS OF SOLIDS

**B.Tech. (P&I) 3rd semester
3L+0T**

UNIT	CONTENTS	CONTACT HOURS
I	Stress and Strain: Elementary definition of stress and strain, stress-strain relationship, elastic, plastic and visco-elastic behavior of common materials in tension and compression test, stress-strain curves, Hooke's law, Poisson's ratio, elastic constants and their relations for an isotropic hookean material, anisotropic and orthotropic materials.	3
	Tension, compression, shearing stress and strain, thermal stresses, composite bars, equations of static equilibrium, concept of free body diagram. Strain energy due to axial loading.	5
II	Members Subjected to Flexural Loads: Theory of simple bending, bending moment and shear force diagrams for different types of static loading and support conditions on beams.	4
	bending stresses, section modulus and transverse shear stress distribution in circular, hollow circular, I, Box, T, angle sections etc. Strain energy due to bending.	5
III	Principal Planes, Stresses and Strains: Members subjected to combined axial, bending and torsional loads, maximum normal and shear stresses, concept of equivalent bending and equivalent twisting moments, Mohr's circle of stress and strain.	5
IV	Torsion: Torsional shear stress in solid, hollow and stepped circular shafts, angular deflection and power transmission capacity. Strain energy due to torsional loads.	6
	Stability of Equilibrium: Instability and elastic stability, long and short columns, ideal strut, Euler's formula for crippling load for columns of different ends, concept of equivalent length, eccentric loading, Rankine formulae and other empirical relations.	4
V	Transverse Deflection of Beams: Relation between deflection, bending moment, shear force and load, transverse deflection of beams and shaft under static loading, area moment method, direct integration method.	6
	Thin-walled Pressure Vessels: Stresses in cylindrical and spherical vessels	2

3PIU4: MATERIAL SCIENCE AND ENGINEERING

**B.Tech. (P&I) 3rd semester
3L+0T**

Unit	Contents	Contact Hours
I	Crystal structure – BCC, FCC and HCP, unit cell, crystallographic planes and directions, miller indices. Crystal imperfections, point, line, surface and volume defects.	4
	Frank Reed source of dislocation, Elastic & plastic modes of deformation, Bauschinger's effect, slip & twinning, strain hardening, cold/hot working recovery, re-crystallization and grain growth.	4
II	Classification of Engineering Materials: Solidification of metals and of some typical alloys, mechanism of crystallization (i) nuclear formation (ii) crystal growth, general principles of phase transformation in alloys, phase rule and equilibrium diagrams, equilibrium diagram of binary system having complete mutual solubility in liquid state and limited solubility in solid state, binary isomorphous alloy system, Hume-Rothery rule, binary system with limited solid solubility of terminal phase and in which solubility decreases with temperature and also alloy with a peritectic transformation, equilibrium diagram of a system whose components are subject to allotropic change.	5
	Iron carbon equilibrium diagram, phase transformation in the iron carbon diagram, eutectic, peritectic, eutectoid and peritectoid reactions and microstructures.	3
III	Isothermal transformation diagrams –cooling curves superimposed on Isothermal Transformation diagram, critical cooling rate. (i) Formation of Austenite from Pearlite (ii) Transformation of Austenite into Pearlite.	4
	Full annealing, stress relief, spheroidizing – normalizing, hardening and tempering of steel. Hardenability, Jominey end quench test – Austempering, martempering. Case hardening, carburising, nitriding, cyaniding, carbonitriding. Flame and Induction hardening.	4
IV	Non-Metallic Materials- Polymers – types of polymer, commodity & engineering polymers – Properties & applications of PE, PP, PS, PVC, PMMA, PET, PC, PA, ABS, PI, PAI, PPO, PPS, PEEK, PTFE Polymers. Urea & Phenol formaldehydes.	4
	Constitution of alloys: Solid solutions - substitutional and interstitial. Ferrous and Non Ferrous Metals- Effect of alloying additions on steel (Mn, Si, Cr, Mo, V, Ti & W) - stainless and tool steels – HSLA steel.	4
V	Mechanical Properties and Testing: Types of fracture, testing of materials under tension, compression and shear loads – hardness tests (Brinell, Vickers and Rockwell) Impact test Izod and Charpy, fatigue and creep test.	4
	Classification of steels & cast iron. constitution and properties. BIS standards. Engineering Ceramics – Properties and applications of Al ₂ O ₃ , SiC, Si ₃ N ₄ , PSZ etc. Fiber and particulate reinforced composites and resin plastics. Introduction to Nano materials- Nano structured materials. Nano clusters & Nano crystals.	4
		40

3PIU5: FLUID ENGINEERING

**B.Tech. (P&I) 3rd Semester
3L+0T**

UNIT	CONTENTS	CONTACT HOURS
I	Fluid Properties: Definition of a fluid, Viscosity-dynamic and kinematic, Surface Tension.	3
	Fluid Statics: Basic equation of fluid statics, Manometers, Force on plane areas and curved surfaces, center of pressure, Buoyant force, Stability of floating and submerged bodies.	5
II	Fluid flow concepts and Basic control volume equations: General control equation, conservation of mass, energy equation and its application, Momentum equation and its applications	4
	Basic governing differential equation: Reynolds transport equation, continuity equation, momentum equation, energy equation, Bernoulli's equation.	4
III	Viscous flow: Laminar flow through pipe and between parallel plate.	4
	Turbulent flow: Relation, Prandtl mixing length, Losses in open and closed conduit	4
IV	Measurements: Pressure, velocity, flow measurement-orifices, venturimeter, orificemeter, nozzle meter, notches and weirs.	3
	Flow through pipe: Major and minor Losses in pipe, Hydraulic and energy gradient line, Network of pipes-series and parallel.	5
V	Hydraulic Turbines: Classification of hydraulic turbines, work done and efficiencies of Pelton, Francis and Kaplan turbines, Draft tube, Specific speed and unit quantities	5
	Hydraulic systems: Hydraulic press, Hydraulic accumulator, Hydraulic Intensifier, Hydraulic Ram, Hydraulic lift, Hydraulic coupling, Hydraulic torque convertor Gear pump.	3

3PIU6: FOUNDRY AND WELDING TECHNOLOGY

**B.Tech. (P&I) 3rd semester
3L+0T**

Unit	Contents	Contact Hours
I	General Classification and Introduction to Manufacturing processes. Pattern Practice: Introduction, advantage and disadvantages of casting over other manufacturing process, conventional casting procedure, requirement of a good pattern, types of patterns, pattern materials, pattern allowances.	3
	Moulding Practice: Moulding sands: types, composition, preparation, properties, conditioning and testing - Grain fineness; moisture content, clay content and permeability test.; types of moulds, moulding processes, moulding machines; Cores: Functions of core, type of cores, core print, core box, Gating system: types, pouring basin, sprue, gating ratio, chills, runner and risers; Gating system design and risering design, pouring time.	5
II	Casting Practice: Basic rules for good casting design, Foundry equipment and furnaces. Melting, pouring and solidification. relative advantages, disadvantages and applications of casting processes, Sand casting,	3
	shell-mould casting, plaster-mould casting, ceramic-mould casting, vacuum casting, evaporative pattern casting (lost foam), Investment casting, slush casting, die casting, centrifugal casting, continuous casting.	3
	Cleaning, finishing and heat treatment of casting	2
III	Welding processes: Introduction, advantages, disadvantages and application of welding, Classification of welding process; Types of joints, welding joint, safety feature in welding, weldability, welding symbols, soldering and brazing.	4
	Welding electrodes, selection of welding electrodes, flux. Pressure welding: forge welding, resistance electric welding, butt welding, flash welding, spot welding, seam welding, projection welding. Fusion welding: gas welding, electric arc welding, metallic arc welding, carbon arc welding, shielded arc welding, Thermit welding.	4
IV	TIG welding, MIG welding, submerged arc welding, ultrasonic welding, plasma arc welding, laser beam welding, friction welding, cold welding, under water welding.	3
	Thermal cutting of metals, welding of dissimilar metals, welding of plastics, Residual welding stresses, heat treatment of weldments,	5
V	Testing of Castings and Weldments: Causes and remedies for casting defects, welding defects. Destructive testing methods: tensile test, compression test, bend test, impact test, hardness test.	4
	Non destructive testing methods: visual inspection, leak test, x-ray and X-ray radiography, magnetic particle test, liquid penetration test, fluorescent penetration test, ultrasonic test, eddy-current test, allowable defects and quality control of welding as per ASME standard.	4

3PIU11: PRODUCTION PRACTICE-I

B.Tech. (P&I) 3rd Semester

OL+OT+3P

SN	NAME OF EXPERIMENT	
	Machine Shop	
1	To study lathe machine construction and various parts including attachments, lathe tools cutting speed, feed and depth of cut.	
2	To perform step turning, knurling and chamfering on lathe machine as per drawing.	
3	To perform taper turning (a) by tailstock offset method as per drawing (b) Using compound rest.	
4	To prepare the job by eccentric turning on lathe machine.	
5	To study shaper machine, its mechanism and calculate quick return ratio. To prepare a job on shaper from given mild steel rod.	
	Foundry Shop	
6	To prepare mould of a given pattern requiring core and to cast it in aluminum.	
7	To perform moisture test and clay content test.	
8	Strength Test (compressive, Tensile, Shear Transverse etc. in green and dry conditions) and Hardness Test (Mould and Core).	
9	To perform permeability test	
10	A.F.S. Sieve analysis test.	
	Welding Shop	
11	Hands-on practice on spot welding.	
12	Hands-on practice on submerged arc welding	
13	Hands-on practice on metal inert gas welding (MIG) and tungsten inert gas welding (TIG).	

3PIU12: INTRODUCTION TO MECHANICAL ENGINEERING LAB

B.Tech. (P&I) 3rd Semester

OL+OT+2P

SN	LABORATORY WORK	
	Exposure to a wide range of applications of mechanical engineering through a variety of activities, including hands-on assembly and disassembly of machines, such as, bicycle, sewing machine, pumps, engines, air-conditioners, machine-tools, amongst others; observational study of complex systems via cut sections, visits, videos and computer simulations; design of simple machines/systems including specifications formulation; visits to industries.	
	Note: Student will be required to submit written report indicating the learning achieved by Hands on assembly/Disassembly.	

3PIU13: MATERIAL SCIENCE AND TESTING LAB.

B.Tech. (P&I) 3rd Semester

OL+OT+2P

SN	NAME OF EXPERIMENT	
1	(a) Study of various crystals structures through models BCC, FCC, HCP, tetrahedral and octahedral voids. (b) Material identification of, say, 50 common items kept in a box.	
2	Specimen preparation for metallographic examination /micro structural examination-cutting, grinding, polishing, etching.	
3	Comparative study of microstructures of different given specimens (mild steel, gray C.I., brass, copper etc.)	
4	Heat treatment experiments such as annealing, normalizing, quenching, case hardening and comparison of hardness before and after.	
5	Study of Microstructure and hardness of steel at different rates of cooling. Microstructure examination of white cast iron.	
6	To perform Tensile/Compressive/Shear/torsion test on a given material and to determine its various mechanical properties under tensile/compression/Shear/torsional loading	
7	To determine Rockwell/ Vickers/Brinell hardness of a given material	
8	To perform Impact test on a given material and to determine its resilience.	
9	To study and perform Fatigue test on a given material and to determine fatigue strength of the material	
10	To perform Bending test and to determine the Young's Modulus of Elasticity via deflection of beam.	
11	Creep testing on creep testing machine	

REFERENCE BOOKS

3PIU14: FLUID MECHANICS LAB.

B.Tech. (P&I) 3rd Semester

OL+OT+2P

SN	NAME OF EXPERIMENT	
1	Determination of Meta-centric height of a given body.	
2	Determination of Cd, Cv & Cc for given orifice.	
3	Calibration of contracted Rectangular Notch and / Triangular Notch and determination of flow rate.	
4	Determination of velocity of water by Pitot tube.	
5	Verification of Bernoulli's theorem.	
6	Calibration and flow rate determination using Venturimeter & Orifice meter and Nozzle meter	
7	Determination of head loss in given length of pipe.	
8	Determination of the Reynold's number for laminar, turbulent and transient flow in pipe.	
9	Determination of Coefficient for minor losses in pipes.	
10	To study the velocity distribution in a pipe and also to compute the discharge by integrating the velocity profile.	
11	To study the boundary layer velocity profile over a flat plate and to determine the boundary layer thickness.	

Handwritten signatures and initials are present at the bottom of the page, including the name Anil K. Mathus.

4PIU1: ADVANCED ENGINEERING MATHEMATICS -II

B.Tech. (P&IE) 4th semester
3L+1T

UNIT	CONTENTS	CONTACT HOURS
	Complex Analysis: Differentiability and Analytic functions, Cauchy-Riemann equations (Cartesian and Polar forms), Harmonic functions. Conformal mapping.	9
	Complex Line integral, M-L inequality, Cauchy theorem, Morera's theorem, Cauchy integral formulae, Taylor series and Laurent series. Singularities and Zeros, residues at poles and infinity, residues at isolated essential singular point, Cauchy residue theorem, evaluation of real definite integrals and improper integrals.	8
	Special Functions: Legendre's function, Rodrigues formula, generating function, Simple recurrence relations, orthogonal property. Bessel's functions of first and second kind, generating function, simple recurrence relations, orthogonal property.	8
	Statistics & Probability: Basic concepts of probability, conditional probability, Baye's theorem. Random variable and distributions: Discrete and continuous random variables, Moments, Expectation, Moment generating function, Binomial, Poisson and Normal distribution.	9

4PIU3: WORK SYSTEM DESIGN AND ERGONOMICS

**B.Tech. (P&I) 3rd semester
3L+0T**

UNIT	CONTENTS	CONTACT HOURS
I	Concept of Productivity, effectiveness and efficiency, work components of manufacturing time and work content, factors tending to reduce productivity, reducing work content and ineffective time.	3
	Work Study: Objectives of work study - work study procedure human factors in the application of work study-relationship between method study and work measurement.	5
II	Method Study: General principles - basic steps-criteria for selecting work-samples and techniques – data collection-critical evaluation-brain storming and creativity-development of new methods and installation principles of layout of material handling	4
	Principles of motion economy-work place layout-examples of method study in plants and offices. Work place and work environment design.	4
III	Work Measurement: Introduction to work measurement, purpose-use of work measurement-basic procedure-time study equipment's-selection of jobs to be studied-approach to workers-steps in making a time study-number of cycles to be studied.	5
	Performance rating and allowances: Rating-use of rating factor-allowances-personal allowance, fatigue allowance-compiling allowed time for a job - examples of time study-synthesis from standard data. Use of work measurement techniques	4
IV	Work sampling, Theory; determination of number of observations needed, confidence limits-area of application limitations-systematic work sampling and random work sampling.	5
	Ancillary techniques: Pre-determined Motion standards, MTM and work factor-design of work place, design of fixtures and equipment's, standard data, TMU formula, job evaluation and merit rating.	3
V	Ergonomics: The nature of Ergonomics; Ergonomics practice Systems concepts. Human body measurement (Anthropometry).	5
	Joints, bones, muscles. Layout of equipment. Seat design. Design of controls and compatibility.	3

4PIU4: THEORY OF MACHINES

**B.Tech. (P&I) 4th semester
3L+0T**

UNIT	CONTENTS	CONTACT HOURS
I	Introduction to mechanism: Basic concept of machines, links, kinematic pair, kinematic chain and mechanism. Inversions of kinematic chains: four bar chain mechanisms, quick return mechanisms, inversions of double slider crank mechanisms.	5
	Velocity and acceleration in mechanism: Velocity and acceleration polygons, relative velocity and instantaneous centre method	3
II	Friction devices: Types and laws of friction. Pivots and collars. Power screws such as lead screw of the lathe.	4
	Clutches: Single and multi-plate clutches. Brakes: Band, block and band and block brakes.	4
III	Gears: Laws of gearing, gears terminology; tooth form; interference, undercutting and minimum number of teeth on pinion. Rack and pinion, Spur, helical, basic introduction of bevel, worm and worm gears,.	6
	Gear Trains: Simple, compound and epicyclic gear trains.	3
IV	Cams: Type of cams; displacement, velocity and acceleration curves for different cam followers; consideration of pressure angle and wear.	4
	Gyroscope: Principles of gyroscopic couple, effect of gyroscopic couple and centrifugal force on vehicles taking a turn, stabilization of ship.	4
V	Balancing: Balancing of rotating masses in same and different planes, balancing of reciprocating masses, swaying couple, hammer blow and tractive effort.	7

4PIU6: INDUSTRIAL MANAGEMENT

B.Tech. (P&I) 4th Semester
3L+0T

Unit	Contents	Contact Hours
I	Management: Definition including conceptual analysis, functions. Evolution of management thought, scientific management, contributions of Taylor, Gilbert, Gantt, Elton Mayo, Henry Fayol and others.	5
	Management process & systems approach to Management, functions of managers. Levels of management, Administration & Mnmgt. Decision making.	3
II	Forms of ownership: Proprietorship, partnership, joint stock company, private and public limited companies, Joint Stock Companies: Co -operative Society, choice of business forms and state undertakings. Multinational corporations.	4
	Management Planning: Managerial planning, Type of plans, steps in planning; mission, objectives, strategies, policies, procedures, rules and programs. Managing by objectives, strategic planning process, SWOT analysis.	4
III	Organizing: Meaning of organizing and organization, formal and informal organization, span of management, process of organizing. Organizational structure: Line organization, functional organization, matrix organization, strategic business units. Line/Staff concepts, empowerment, and decentralization, delegation of authority.	5
	Effective organizing and organizational culture. Staffing: overview, factors affecting staffing, systems approach, job design, selection, Performance appraisal, rewards. Career strategy, managerial training. Managing change.	4
IV	Human factors in managing Motivation : Theory X, Theory Y, Maslow's hierarchy of needs, Hertzberg's hygiene theory, porter and Lawler model, equity theory, Reinforcement theory, McClelland's theory behavioral model.	5
	Motivational techniques, job enrichment. Leadership: traits, approaches situational, contingency, path goal approach, transactional and transformational leadership.	3
V	Group decision making: Reasons for using Committees and groups, successful operation of committees and groups, working in teams. Communication: purpose, process of communication, communication flow in the organization, barriers to communication, Improvement of communication; role of electronic media in communication.	5
	Controlling: Basic control process, feed forward and feedback control, performance measures and control, requirement of effective control, use of Information Technology for control.	3

4PIU11: PRODUCTION PRACTICE - II

B.Tech. (P&I) 4th semester

OL+OT +3P

UNIT	NAME OF EXPERIMENT
1	To study of single point cutting tool geometry and to grind the tool as per given tool geometry.
2	To study the milling machine, milling cutters, indexing heads and indexing methods and to prepare a gear on milling machine.
3	To machine a hexagonal / octagonal nut using indexing head on milling machine.
4	To cut BSW/Metric internal threads on lathe machine.
5	To cut multi-start Square/Metric threads on lathe machine.
	Boring using a boring bar in a centre lathe.
6	Study of capstan lathe and its tooling and prepare a tool layout & job as per given drawing.
7	Demonstration on milling machine for generation of plane surfaces and use of end milling cutters.
8	Grinding of milling cutters and drills.
9	Exercise on cylindrical and surface grinders to machine surfaces as per drawing.
10	Cylindrical grinding using grinding attachment in a centre lathe

4PIU12: PRODUCTION ENGINEERING DRAWING

B.Tech. (P&I) 4thSemester

OL+OT+3P

SN	CONTENTS
	Review of sectioning, Review of BIS Standard (SP 46), Fasteners – screws, bolts and nuts, riveted joints, pins, locking devices, welded joints, pipe joints, unions and valves. Assemblies involving machine elements like shafts, couplings, bearing, pulleys, gears, belts, brackets. Tool drawings including jigs and fixtures. Engine mechanisms-assembly and disassembly. Production drawings - limits, fits and tolerances, dimensional and geometric tolerances, surface finish symbols. Layout drawings. Schematics, process and instrumentation diagrams, piping drawings. Structural drawings - examples for reading and interpretation. Computer aided design and use of software packages for engineering drawings
	Assembly Drawing with sectioning and bill of materials Universal Coupling, Forming punch and die, Jigs for inspecting shaft etc.(1 drawing sheet of any assembly) Lathe tail stock, shaper tool head, steam stop valve, feed check-valve, swivel machine vice etc (1 drawing sheet of any assembly)
	Detailed part drawings from assembly drawing indicating fits, tolerances and surface finish symbols by referring BIS codes (1 drawing sheet) Check-valve, Junction Valve etc.
	Computer Aided Drafting (4 drawings) Introduction, input, output devices, introduction to software like AutoCAD/ProE/Creo/Solidworks, basic commands and development of 2D and 3D drawings of simple parts
	Free Hand Sketches: Connecting rod, crank shaft, Pipes and Pipe fittings, machine arbor and cutter, universal dividing head, jigs and fixtures, Step less drive, sliding gear box, safety valve, three way stop valve, blow-off cock, Swivel bearing, Turret Tool Post, drill-press vice, screw jack

4PIU13: THEORY OF MACHINES LAB.

B.Tech. (P&I) 4th Semester

OL+OT+2P

SN	NAME OF EXPERIMENT
1	To study inversions of four bar chain and slider crank mechanism and their practical applications.
2	To study Steering Mechanisms: Davis and Ackerman.
3	Study of quick return mechanism and its practical applications.
4	Study of inversion of Double slider chain: Oldham Coupling, Scotch Yoke and Elliptical Trammel.
6	Study of various cam-follower arrangements. To plot displacement v/s angle of rotation curve for various cams
7	To determine co-efficient of friction using two roller oscillating arrangement.
8	Study of various types of dynamometers, Brakes and Clutches.
9	Study of differential gear box.
13	To verify the torque relation for gyroscope.
16	To perform wheel balancing. To perform static and dynamic balancing on balancing set up.
19	Study of a lathe gear box, sliding mesh automobile gear box, planetary gear box.

4PIU14: WORK SYSTEM DESIGN LAB

B.Tech. (P&I) 4th Semester

OL+OT+2P

SN	LABORATORY WORK
1	Rating: To obtain practice in rating operators' performance in Card Dealing and Walking.
2	Man Machine Chart a) Prepare man machine chart for drilling two holes in a plate 10 mm thick on a radial drilling machine. b) To determine standard time for drilling a hole in mild steel workpiece by stopwatch method.
3	Two handed Process Chart a) To draw two handed process chart for bulb holder assembly and to suggest a satisfactory layout. b) To find out standard time for assembly.
4	Left - Hand and Right - Hand Operation Chart a) To make left hand and right hand operation chart for bolts and washer assembly. b) Draw work place layout using principles of motion economy.
5	Pin Board Experiment
6	To practice various Graphic tools for method study
	To study with reference to the bulb holder assembly operation the following aspects : (i) Learning effect (ii) Sequence of operation (iii) Preparation of 2-H process chart and computing cycle time.
7	To determine the normal working area, max. working area, height for a normal man (i) for the assembly of pins in a box (ii) For the assembly of Nuts, bolts and washers.
8	Work sampling Practice
9	MTM practice
10	To study the operator's performance under different working conditions (light, temperature, sound, atmosphere etc.)

Anil K. Mathus

SPIU1: THERMAL ENGINEERING

B.Tech. (P&IE) 5th semester

3L+1T

Unit	Contents	Contact hours
I	Heat Transfer: Introduction, Fourier's law of conduction, Newton Rikhman equation, Stefan Boltzmann law, Overall heat transfer coefficient.	2
	Conduction: Three dimensional heat flow equation-Cartesian coordinates. One dimensional steady state conduction without heat generation, One dimensional flow through a plane wall, composite wall and tube, thick spherical shell, Critical insulation, Heat flow through fins.	6
II	Convection: Dimensional analysis of forced and free convection, empirical relations.	5
	Radiation: Introduction, Absorption, reflection and transmission, Monochromatic, total emissive power, view factor	3
III	Heat exchanger: Types of Heat Exchanger, LMTD equation for parallel and counter flow Heat Exchanger and its applications. Effectiveness - NTU Method	8
IV	Refrigeration: Air refrigeration system, vapour compression and vapour absorption system, steam refrigeration	4
	Refrigerants, Refrigeration equipments, Reciprocating Air Compressor.	4
V	Air Conditioning: Properties of moist air, Psychrometric chart and its use, Elementary psychrometric processes. Comfort Air Conditioning.	8

5PIU3: QUALITY CONTROL AND RELIABILITY ENGINEERING

B.Tech. (P&IE) 5th semester

3L+0T

Unit	Contents	Contact hours
I	The meaning of Quality and quality improvement, dimensions of quality, history of quality methodology, quality control, Quality of design and quality of conformance, Quality policy and objectives, Economics of quality.	5
	Modeling process quality: Describing variation, frequency distribution, continuous and discrete, probability distributions, pattern of variation, Inferences about process quality: sampling distributions and estimation of process parameters. Analysis of variance.	4
II	Statistical Quality Control: Concept of SQC, Chance and assignable causes of variation, statistical basis of control chart, basic principles, choice of control limits, sample size and sampling frequency, analysis of patterns on control charts. The magnificent seven.	4
	Control chart for variables,: X-bar and R charts, X-bar and S charts, control chart for individual measurement. Application of variable control charts.	4
III	Control chart for attributes: control chart for fraction non conforming P-chart, np-chart, c-chart and u-chart. Demerit systems, choice between attribute and variable control chart. SPC for short production runs. Process capability analysis using histogram and probability plot, capability ratios and concept of six sigma.	7
IV	Quality Assurance: Concept, advantages, field complaints, quality rating, quality audit.	2
	Acceptance Sampling: Fundamental concepts in acceptance sampling, operating characteristics curve. Acceptance sampling plans, single, double and multiple sampling plans, LTPD, AOQL, AOQ.	4
	Introduction to Quality systems like ISO 9000 and ISO 14000.	2
V	Reliability and Life Testing- Failure models of components, definition of reliability, MTBF, Failure rate, common failure rate curve, types of failure, reliability evaluation in simple cases of exponential failures in series, paralleled and series-parallel device configurations, Redundancy and improvement factors evaluations. Introduction to Availability and Maintainability	8
TOTAL		40

PIU4: MEASUREMENT & METROLOGY

B.Tech. (P&IE) 5th semester

3L+0T

UNIT	CONTENTS	CONTACT HOURS
I	Concept of measurement: General concept of measurement, Need for measurement, Generalized measuring system, Units, Standards, Sensitivity, Readability, Range of accuracy, Precision, Accuracy Vs precision, Uncertainty.	4
	Repeatability and reproducibility, Errors in measurement, Types of error, Systematic and random error, Calibration, Interchangeability.	3
II	Linear and angular measurements: Linear measuring instruments: Vernier caliper, Micrometer, Slip gauges, Optical flat, Application of limit gauges;	3
	Comparators:- Mechanical comparators, Electrical comparator, Pneumatic comparator;	2
	Sine bar, Use of sine bar, Limitations of sine bars, Sources of error in sine bars, Bevel protractor, Applications of bevel protractor.	4
III	Form measurement: Introduction, Screw thread measurement, Thread gauges, Measurement of gears: Gear errors, Spur gear measurement, Parkinson gear tester.	4
	Surface finish measurement:-Introduction, Elements of surface texture, Analysis of surface finish, Methods of measuring surface finish, Straightness measurement, Flatness testing, Roundness measurements	4
IV	Machine tool metrology: Coordinate measuring machine (CMM):-Types of CMM, Features of CMM,Computer based inspection, Computer aided inspection using robots.	5
V	Measurement of force: Accelerometer, Load cells. Torque measurement: Torque measurement using strain gauges, Torque measurement using torsion bars, Measurement of power: Mechanical dynamometers,	4
	Measurement of flow: Variable area meters – rotameter, Hot wire anemometer, Pitot tube. Temperature measurement: Thermocouples (Thermo electric effects), Thermistors, Pyrometers	4

SPIU5.1: PRINCIPLES OF MACHINE TOOLS

**B.Tech. (P&IE) 5th semester
3L+0T**

UNIT	CONTENTS	CONTACT HOURS
I	Machine tools:- Concept and definition of machining and machine tools. Concept of producing geometrical surfaces by generatrix and directrix.	5
	Type of Machine tools, General requirements of machine tool design, Working and auxiliary motions in machine tools, Parameter defining working motion of machine tool.	3
II	Machine drives: Mechanical transmission, Hydraulic transmission, Electrical circuits.	2
	Stepped regulation of speed: Design of speed box. Design of machine tool structures, Basic principles of design for strength, Basic principles of design for rigidity.	2
	Introduction to design of lathe beds	4
III	Introduction to guides and slideways: Types of slideways, Design of slideways, Shapes of slideways, Application of slideway Profiles and their combination, Material of slideways, Type of connecting sections and their applications, Clearance adjustment in slides. Anti-friction guideways.	8
IV	Machine tool spindles and spindle bearings, Kinematic systems and operations of lathes, Kinematic systems and operations of drilling machine, Kinematic systems and operations of milling machine.	8
V	Construction, working principle and applications of shaping, planing and slotting machines	4
	Alignment & Acceptance test of lathe, milling, drilling machines	4
TOTAL		40

TEXT BOOK

5PIU5.2: RENEWABLE ENERGY SYSTEMS

B.Tech. (P&I) 5th semester

3L+1T

Unit	CONTENTS	Contact Hours
I	Global and National scenarios, Form and characteristics of renewable energy sources. Solar Energy: Solar radiation, its measurements and prediction, Solar thermal collectors, flat plate collectors, concentrating collectors, Basic theory of flat plate collectors, solar heating of buildings, solar still, solar water heaters, solar driers, conversion of heat energy in to mechanical energy, solar thermal power generation systems.	2
	Solar Photovoltaic: Principle of photovoltaic conversion of solar energy, types of solar cells and fabrication, Photovoltaic applications: battery charger, domestic lighting, street lighting, water pumping, power generation schemes	3
II	Wind Energy: Atmospheric circulations, classification, factors influencing wind, wind shear, turbulence, wind speed monitoring, Betz limit, WECS-classification, characteristics, applications.	3
III	Ocean Energy: Ocean energy resources, ocean energy routes, Principles of ocean thermal energy conversion systems, ocean thermal power plants, Principles of ocean wave energy conversion and tidal energy conversion.	4
IV	Other Sources: Nuclear fission and fusion, Geothermal energy- Origin, types of geothermal energy sites, site selection, geothermal power plants, Magneto-hydro-dynamic (MHD) energy conversion, Formation of biomass, photosynthesis, Biomass resources and their classification, Chemical constituents and physicochemical characteristics of biomass, Biomass conversion processes.	5
V	Fuel Cells: Thermodynamics and electrochemical principles, Basic design, types, applications.	5
	Hydrogen Energy: Economics of hydrogen, Production methods.	
TOTAL		40

5PIU5.3: ADVANCED WELDING TECHNOLOGY

B.Tech. (P&I) 5th semester
3L+0T

UNIT	CONTENTS	CONTACT HOURS
I	Welding: Introduction, Classification, Advantages and disadvantages of welding and Selection of power sources: Constant voltage and constant current power sources. Heat Transfer and associated losses. Metal Transfer: Mechanism and types of metal transfer in various arc welding processes.	8
II	Solid state welding: Classification of solid state welding processes, advantages, and applications. Ultrasonic welding Process and Explosive Welding.	7
III	Friction welding: Friction welding process variables, welding of similar and dissimilar materials, Defective analysis of friction welded components, Friction welding of materials with inter layer. Friction stir welding: Processes parameters, tool geometry, welding of similar and dissimilar materials, Friction stir welding of Aluminum alloys and Magnesium alloys. Introduction of Hybrid FSW.	8
IV	EBW and LBW: Electron Beam welding process parameters, atmospheric affect Defective analysis of Electron beam welds and Electron Beam welding dissimilar materials. Laser Beam welding process parameters, atmospheric affects in LBM and Laser Beam welding of steels.	8
V	Weldability: Weldability studies of cast iron and steel, Effects of alloying elements on weld ability, welding of plain carbon steel, Cast Iron and Aluminum. Micro & Macro structures in welding. Welding defects and inspection methods.	7

SPIU6.1: CNC MACHINES AND PROGRAMMING

B.Tech. (P&IE) 5th semester
3L+0T

UNIT	CONTENTS	CONTACT HOURS
I	Introduction: Definition of NC, Applications of NC ,Historical Developments in Automation,Classification of NC Systems,Comparison of NC and Conventional Machines,Advantages of NC	8
II	NC Hardware: Architecture of NC Systems, Design Considerations, Mechanical Elements, Structure, Guideways and Slides, Guideway Elements, Transmission Systems, Spindle Unit, Coolant system, Lubrication System, Tool and work Changing Mechanisms, Electrical Elements, Drives, Sensors, Control Loops, Computing Elements/ Firmware, Interpolators	8
III	NC Software: Introduction, Manual Part Programming, Computer-Assisted Part Programming, Language Based , Geometric Modeling Based, Automatic Part Program Generation,	8
IV	CAPP Systems, 5 Axis Programming, Post-Processing, Programming Robots and CMMs	4
	NC Simulation, Kinematic simulation, Volumetric simulation, Applications of Volumetric NC Simulation, Verification	4
V	Advanced Topics:, Adaptive Control, Off-line adaptive control, Various optimisation criteria, Hardware Based AC, Software Based AC, Tooling and Instruments for NC Special Considerations in High Speed Cutting (HSC) and Die Sinking, Rapid Product Development, CAM, FMS, CIM	8

5PIU6.2: MANAGEMENT INFORMATION SYSTEM

B.Tech. (P&I) 5th semester

3L+0T

UNIT	CONTENTS	CONTACT HOURS
I	Organisation & Types, Decision Making, Data & information, Characteristics & Classification of information,	3
	Cost & value of information, Various channels of information & MIS.	2
II	Foundation of Information System : Introduction to Information System in Business Fundamentals of Information System, Solving Business Problems with Information System,	4
	Concept of Balanced MIS, Effectiveness & Efficiency Criteria. Tool and Techniques of MIS- dataflow diagram, flow chart etc.	4
III	Business application of information technology, electronic commerce, Internet, Intranet, Extranet & Enterprise Solutions, Information System for Business Operations,	5
	Information system for managerial Decision Support, Information System for Strategic Advantage	5
IV	Managing Information Technology, Enterprise & Global Management, Security & Ethical Challenges, Planning & Implementing Change..	4
	Reports: Various types of MIS reports, GUI & Other Presentation tools	4
V	Advanced concepts in information system: Enterprise Resource Planning: introduction, various modules like Human Resources, Finance, Accounting, Production & Logistics.	5
	Supply Chain Management, CRM, Procurement Management System Object Oriented modeling case studies.	4

SPIU6.3: STATISTICS FOR DECISION MAKING

B.Tech. (P&IE) 5th semester
3L+0T

Unit	Contents	Contact Hours
	Introduction - Statistical Terminology: Descriptive statistics or exploratory data analysis, inferential statistics, population, sample, variable, parameter, statistic, random sample.	3
I	Collecting Data: Historical data, types of studies (comparative, descriptive or noncomparative, observational, experimental), sample surveys, sampling and nonsampling errors, bias, representative sample, judgment sampling, quota sampling, simple random samples, sampling rate, sampling frame, stratified random sampling, multistage cluster sampling, probability-proportional-to-size sampling, systematic sampling.	4
II	Summarizing and Exploring Data: Variable types (categorical, qualitative, nominal, ordinal, numerical, continuous, discrete, interval, ratio), summarizing categorical data (frequency table, bar chart, Pareto chart, pie chart), summarizing numerical data (mean, median), skewness, outliers, measures of dispersion (quantiles, range, variance, standard deviation, interquartile range, coefficient of variation) standardized z-scores, histogram, bivariate numerical data (scatter plot, simple correlation coefficient, sample covariance), straight line regression, summarizing time-series data, data smoothing, forecasting techniques.	4
	Basic Concepts of Inference: Estimation, hypothesis testing, point estimation, confidence interval estimation, estimator, estimate, bias and variance of estimator, mean square error, precision and standard error, confidence level and limits, null and alternative hypothesis, type I and II error, probabilities of type I and II error, acceptance sampling, simple and composite hypothesis, P-value, one-sided and two-sided tests.	4
	Inference for Single Samples: Inference for the mean (large samples), confidence intervals for the mean, test for the mean, sample size determination for the z-interval, one-sided and two-sided z-test, inference for the mean (small samples), t distribution.	4
III	Inference for Two Samples: Independent sample design, matched pair design, pros and cons of each design, side by side box plots, comparing means of two populations, large sample confidence interval for the difference of two means, large sample test of hypothesis for the difference of two means, inference for small samples (confidence intervals and tests of hypothesis).	4
	Inference for Proportions and Count Data: Large sample confidence interval for proportion, sample size determination for a confidence interval for proportion,	3
IV	Large sample hypothesis test on proportion, comparing two proportions in the independent sample design (confidence interval and test of hypothesis), chi-square statistic	4
	Simple Linear Regression and Correlation: Dependent and independent variables, probability model for simple linear regression, least squares fit, goodness of fit of the LS line, sums of squares, analysis of variance, prediction of future observation, confidence and prediction intervals,	4
V	Multiple Linear Regression: Probability model for multiple linear regression, least squares fit, sums of squares. Use Excel, R, and MATLAB® in the class.	4
TOTAL		40

TEXT BOOK

1	Ajit Tamhane and Dorothy Dunlop "Statistics and Data Analysis: From Elementary to Intermediate" Prentice Hall	1999

Handwritten signatures and scribbles

SPIU11: THERMAL ENGINEERING LAB

B.Tech. (P&IE) 5th Semester
OL+OT+3P

SN	NAME OF EXPERIMENT
1	Comparative study of a) Four stroke diesel and petrol engines. b) Two stroke petrol and diesel engines
2	Studies of fuel supply systems of diesel and petrol engines.
3	Study of cooling, lubrication and ignition system in diesel and petrol engines.
4	To study various types of Boilers and to study Boiler mounting and accessories.
5	To study various types of Dynamometers.
6	To study Multi Stage Air Compressors.
7	To find the BHP, Thermal efficiency of four stroke diesel engine.
8	Study of Brakes, Clutches, and Transmission System.
9	To prepare a comparison sheet of various automobiles (4 Wheeler and 2 Wheeler).
10	Study of parallel flow and counter flow heat exchanger.
11	Load test on Petrol Engine and Diesel engine.
12	Determination of conductivity of insulating powder.
13	Determination of effectiveness of parallel and counter flow heat exchanger.

SPIU12: MACHINE TOOL DESIGN SESSIONAL

B.Tech. (P&I) 5th Semester
OL+OT+3P

Max. Marks: 75
Exam Hours: 3

SN	SESSIONAL WORK
1	Functional requirements of machine tools.
2	Working and auxiliary motions in machine tools.
3	Design criterion for machine tool structure, Static & dynamic stiffness.
4	Function & important requirements of spindle unit.
5	Importance of machine tool compliance with respect to machine tool accuracy.
6	Application and sketching of Slider-crank mechanism, Cam mechanism, Rack & pinion mechanism, Nut & screw mechanism, Ratchet gear mechanism, Geneva mechanism, Reversing mechanism, Differential mechanism, Norton mechanism, Mender's mechanism.
7	Aim of speed & feed rate regulation, stepped regulation of speed.
8	G.P. series is used in steeped regulation of speed.
9	Design a four / six speed Gear Box.
10	Design of Lathe bed. (including Torque analysis of lathe bed, bending of lathe bed, designing for torsional rigidity, use of reinforcing stiffener in lathe bed)
11	Analysis of force under headstock, tail stock and saddle.
12	Design of Guide ways / Slide ways.
13	Estimation of power requirements and selection of motor for metal cutting machine tool spindles.

Anil K. Mathus

SPIU13: METROLOGY LAB.

B.Tech. (P&IE) 5th Semester
OL+OT+2P

SN	NAME OF EXPERIMENT
1	Study of various measuring tools like dial gauge, micrometer, vernier caliper and telescopic gauges.
2	Measurement of angle and width of a V-groove by using bevel protector..
3	To measure a gap by using slip gauges
4	Measurement of angle by using sine bar.
5	Study and use of surface roughness instrument (Taylor Hobson make) Inspection of various elements of screw thread by Tool makers microscope and optical projector.
6	Measurement of gear tooth thickness by using gear tooth vernier caliper.
7	To check accuracy of gear profile with the help of profile projector.
8	To determine the effective diameter of external thread by using three-wire method.
9	To measure flatness and surface defects in the given test piece with the help of monochromatic check light and optical flat.
10	To plot the composite errors of a given set of gears using composite gear tester.
11	Measurement of coating thickness on electroplated part and paint coating on steel and non-ferrous material using coating thickness gauge.
12	Study and use of hardness tester for rubber and plastics.
13	To check the accuracy of a ground, machined and lapped surface - (a) Flat surface (b) Cylindrical surface.
14	To compare & access the method of small-bore measurement with the aid of spheres.

SPIU14: QUALITY CONTROL LAB

B.Tech. (P&IE) 5th Semester
OL+OT+3P

SN	NAME OF EXPERIMENT
1	Case study on X bar charts and process capability analysis
2	PChart: (a) Verify the Binomial Distribution of the number of defective balls by treating the balls with a red colour to be defective. (b) Plot a P-chart by taking a sample of n=20 and establish control limits
3	To plot C-chart using given experimental setup
4	Operating Characteristics Curve: (a) Plot the operating characteristics curve for single sampling attribute plan for n = 20 ; c = 1 , 2 , 3 Designate the red ball to defective. (b) Compare the actual O.C. curve with theoretical O.C. curve using approximation for the nature of distribution
5	Distribution Verification: (a) Verification of Normal Distribution. (b) To find the distribution of numbered cardboard chips by random drawing one at a time with replacement. Make 25 subgroups in size 5 and 10 find the type of distribution of sample average in each case. Comment on your observations
6	Verification of Poisson distribution
7	Central Limit Theorem: (a) To show that a sample means for a normal universe follow a normal distribution. (b) To show that the sample means for a non normal universe also follow a normal Distribution.

Handwritten signatures and initials are present at the bottom of the page, including the name K. Mathus.

6PIU1: TOOL ENGINEERING

B.Tech. (P&I) 6th semester

3L+1T

UNIT	CONTENTS	CONTACT HOURS
I	Introduction, properties of tool material, types of tool material,	5
	basic requirement of tool material and general consideration in tool design.	3
II	Design of material-cutting tool: Single point tools, basic principles of multiple point tools, Linear-Travel tools (Broach),	4
	Axial Feed Rotary Tools (Drill), Milling Cutters.	3
III	Introduction to press, Press accessories, Die design fundamentals, Strip layout,	4
	Blanking and piercing Dies, Combination Dies (compound & progressive die).	4
IV	Design of Bending Dies,	3
	Design of Drawing and Deep drawing dies.	5
V	Introduction to Jig & Fixtures, usefulness, Principles of Jig & Fixtures design, Principle of location, Locating and Clamping devices.	4
	Basic construction principle, Drilling jigs, Brief introduction about Milling fixtures, Grinding fixtures, Broaching and Lathe fixtures.	5
TOTAL		40

6PIU2: FACILITIES PLANNING

B.Tech. (P&I) 6th Semester
3L+1T

UNIT	CONTENTS	CONTACT HOURS
I	Definition of facilities planning, significance and objectives of facilities planning. Process of facilities planning. Strategic facilities planning.	5
	Product selection, Review of various types of manufacturing processes and Process selection.	3
II	Facility Location: Need for location decisions, location factors, location analysis: Qualitative methods: subjective, equal weight, variable weight, factor point rating and composite measure method.	4
	Quantitative methods: location breakeven analysis, median model, gravity model, Brown and Gibson method, single facility location models, minmax location problem, Location allocation models, Bridgeman's Dimensional Analysis.	4
III	Facility Layout: Importance and function, objectives and advantages of good layout, types of plant layout problems. Basic layout types: Product, Process, Group and fixed position layout. Plant layout factors, Layout procedure, Systematic layout planning procedure, Flow and activity analysis, Process charts, flow diagram, Travel chart, activity relationship chart, and Relationship diagram. Evaluation and implementation of layout. Industrial buildings, influence of building on layout.	4
	Computer aided layout: CRAFT, CORELAP, COFAD, ALDEP, PLANET.	4
IV	Production and assembly line balancing - various operational research techniques for balancing of assembly line and fabrication line.	5
	Material Handling: Principles of material handling, materials handling system design. Systematic handling analysis, Unit loads. Computer Aided Material Handling.	3
V	Material Handling Equipment: Conveyors, monorail, hoists and Cranes; automated storage and retrieval systems (AS/RS) , Industrial trucks, Containers and supports, Auxiliary and other equipments	5
	Receiving and shipping, storage and warehousing; Equipment planning, layout planning.	3

6PIU4: OPERATIONS RESEARCH

B.Tech. (P&I) 6th semester
3L+0T

Unit	Contents	Contact hours
I	Overview of Operations Research	1
	Linear Programming: Applications and model formulation, Graphical method, Simplex method, duality and Sensitivity analysis.	4
	Transportation Model and Assignment Model including travelling salesman problem.	4
II	Integer Linear Programming: Enumeration and cutting Plane solution concept, Gomory's all integer cutting plane method, Branch and Bound Algorithms, applications of zero-one integer programming.	5
	Replacement Models: Capital equipment replacement with time, group replacement of items subjected to total failure.	3
III	Queuing Theory: Analysis of the following queues with Poisson pattern of arrival and exponentially distributed service times, Single channel queue with infinite customer population, Multichannel queue with infinite customer population,	3
	Competitive Situations and Solutions: Game theory, two person zero sum game, saddle point, minimax (maximin) method of optimal strategies, value of the game. Solution of games with saddle points, dominance principle. Rectangular games without saddle point – mixed strategy, approximate solution, and simplified analysis for other competitive situations. Application of linear programming	4
IV	Theory of Decision making: Decision making under certainty, risk and uncertainty. Decision trees.	5
	Deterministic Inventory control models: functional role of inventory, inventory costs, model building, Single item inventory control model without shortages, with shortage and quantity discount. Inventory control model with uncertain demand, service level, safety stock, P and Q systems, two bin system. Single period model. Selective Inventory control techniques.	4
V	Probabilistic Inventory control models: Instantaneous demand without setup cost and with setup cost, Continuous demand without setup cost	4
	Simulation: Need of simulation, advantages and disadvantages of simulation method of simulation. Generation of Random numbers, Generation of Normal Random numbers. Use of random numbers for system simulation. , Monte Carlo simulation, simulation language ARENA, Application of simulation for solving queuing Inventory Maintenance, Scheduling and other industrial problems	4

6PIU5.2: COMPUTER AIDED DESIGN AND GRAPHICS

B.Tech. (P&I) 6th semester
3L+0T

Max. Marks: 150
Exam Hours: 3

UNIT	CONTENTS	CONTACT HOURS
I	Overview of Computer Graphics: Picture representation, Coordinate Systems, Raster Scan Display, DDA for line generation and Bresenham's algorithm for line and circle generation; Graphics standards: GKS, IGES, STEP, DXF. Different types of models.	5
	Parametric representation of plane curves: line, circle, ellipse, parabola and hyperbola.	4
II	Parametric representation of Space Curves: Cubic spline curve, Bezier Curve and B Spline Curves. Blending of Curves.	4
	Parametric representation of Surfaces: Hermite Bicubic surfaces, Bezier surfaces and Bspline surfaces.	4
III	Solid Representation: B-rep. and CSG. Comparison between three types of models.	7
IV	Two and Three Dimensional Transformation of Geometric Models: Translation, Scaling Reflection, Rotation and Shearing, Homogeneous Representation, Combined Transformation.	4
	Projection of Geometric models: Parallel and Perspective Projection.	4
V	Clipping: Point clipping, Line clipping, Cohen- Sutherland algorithm etc., Viewing transformation.	4
	Hidden line and surface removal: Techniques and Algorithms. Shading and Rendering.	4

6PIU5.3: MAINTENANCE MANAGEMENT

B.Tech. (P&I) 7th semester
3L+0T

Max. Marks: 150
Exam Hours: 3

UNIT	CONTENTS	CONTACT HOURS
I	Introduction -Fundamentals of Maintenance Engineering. Maintenance Engineering its importance in material & energy conservation, inventory control, productivity, safety, pollution control etc.	3
	Safety Regulations, pollution problems, human reliability, total quality management (TQM), total productivity maintenance (TPM), environmental issues in maintenance, ISO 9000.	4
II	Maintenance Management - types of maintenance strategies, Planned and unplanned maintenance, breakdown, preventive & predictive maintenance.Their comparison, advantages & disadvantages. Limitations.	4
	Computer aided maintenance, maintenance scheduling, spare part management, inventory control, organisation of maintenance department.	4
III	Tribology in Maintenance, friction wear and lubrication, friction & wear mechanisms, prevention of wear, types of lubrication mechanisms, lubrication processes.	3
	Lubricants - types, general and special purpose, additives, testing of lubricants, degradation of lubricants, seal & packings.	3
	Repair methods for basic machine elements: Repair methods for beds, slideways, spindles, gears, lead screws and bearings–Failureanalysis–Failures and their development–Logical fault location methods–Sequentialfaultlocation.	3
IV	Machine Health Monitoring - Condition based maintenance, signature analysis, oil analysis, vibration, noise and thermal signatures, on line & off line techniques,	4
	Instrumentation & equipment used in machine health monitoring. Instrumentation in maintenance, signal processing, data acquisition and analysis, application of intelligent systems, data base design.	4
V	Reliability, availability & maintainability (RAM) Analysis - Introduction to RAM failure mechanism, failure data analysis, failure distribution, reliability of repairable and non repairable systems.	4
	Improvement in reliability, reliability testing, reliability prediction, utilisation factor, system reliability by Monte Carlo Simulation Technique.	4

6PIU6.1:DATA ANALYTICS

B.Tech. (P&I) 6th semester
3L+0T

UNIT	CONTENTS	CONTACT HOURS
I	Introduction to Multivariate Statistics-Degree of Relationship among Variables-Review of Univariate and Bivariate Statistics-Screening Data Prior to Analysis-Missing Data, Outliers, Normality, Linearity, and Homoscedasticity.	4
II	Multiple Regression- Linear and Nonlinear techniques- Backward-Forward-Stepwise- Hierarchical regression-Testing interactions (2way interaction) - Analysis of Variance and Covariance (ANOVA & ANCOVA) - Multivariate Analysis of Variance and Covariance (MANOVA & MANCOVA).	3
III	Logistic regression: Regression with binary dependent variable - Simple Discriminant Analysis- Multiple Discriminant analysis-Assessing classification accuracy- Conjoint analysis (Full profile method).	4
IV	Principal Component Analysis -Factor Analysis- Orthogonal and Oblique Rotation-Factor Score Estimation-Multidimensional Scaling-Perceptual Map-Cluster Analysis (Hierarchical Vs Nonhierarchical Clustering).	4
V	Latent Variable Models an Introduction to Factor, Path, and Structural Equation Analysis- Time series data analysis (ARIMA model) – Decision tree analysis (CHAID, CART) - Introduction to Big Data Management.	4

6PIU6.2: MANAGERIAL ACCOUNTING, FINANCE & ECONOMICS

**B.Tech. (P&I) 6th semester
3L+0T**

UNIT	CONTENTS	CONTACT HOURS
I	Concept and scope of Engineering Economics. Problem Solving and decisionmaking. Time Value of Money: Interest formulae and their applications.	3
	Cash Flow Diagrams. Single and multiple payment cash flows.	4
II	Methods of comparison of alternatives – present worth method (Revenue dominated cash flow diagram), Future worth method (Revenue dominated cash flow diagram, cost dominated cash flow diagram).	5
	Annual equivalent method (Revenue dominated cash flow diagram, cost dominated cash flow diagram), rate of return method, Examples in all the methods.	4
III	Replacement studies: current salvage value of defender, replacement due to deterioration and obsolescence. Depreciation meaning and methods of computing depreciation-Straight line method of depreciation, declining balance method of depreciation, Sum of the years digits method of depreciation, sinking fund method of depreciation/ Annuity method of depreciation.	4
	Cost and Costs Control: Costs and Cost Accountancy: Meaning of cost and cost Accountancy (C.A.) Financial Accountancy (F.A.) comparison between C.A. and F.A.	
IV	Elements of cost Direct cost and indirect cost, variable costs and fixed cost calculation of Product cost, Cost control-Techniques of cost control.	4
	Budgets- Meaning Kinds, Advantages, Budgetary control. Inflation: Causes of inflation, consequences of inflation, measuring inflation, leasing/buying decisions. Break-Even analysis, linear break-even analysis, Break-Even charts and relationships, Non-linear break-even analysis.	3
V	Finance & Financial Statements: Introduction Needs of Finance, Kinds of Capital Sources of fixed capital shares-ordinary and Preference Shares. Borrow capital. Surplus profits: Sources of Working capital, Management of working capital, Financial Institutions.	4
	Financial Statement (i) Profit & Loss Statement (ii) Balance Sheet (B.S.) Financial ratios-current ratio, Liquidity ratio, Profits investment ratio, equity ratio and Inventory turn-over ratio. Management and Financial ratio, Money conversion cycle in the Business.

6PIU6.3: DESIGN AND MANUFACTURING OF PLASTIC PRODUCTS

**B.Tech. (P&I) 6th semester
3L+0T**

UNIT	CONTENTS	CONTACT HOURS
I	Plastics Materials: An Overview, Classification, Thermoplastics, Thermosets, Crystalline, Amorphous, and Liquid, Additives, Reinforcements, and Fillers, Physical Properties and Terminology.	5
	Mechanical Properties, Thermal Properties, Electrical Properties, Environmental Considerations, Structural Analysis	3
II	Design Considerations for Injection-Molded Parts: Injection Molding Process, Design Strategy, Efficient and Functional Design, Material Selection,	2
	Nominal Wall Thickness, Normal Ranges of Wall Thickness, Structural Requirements of the Nominal Wall,	2
	Insulation Characteristics of the Nominal Wall, Impact Response of the Nominal Wall, Draft, Structural Reinforcement, Ribs, Other Geometric Reinforcement, Bosses, Coring, Fillets and Radii, Undercuts	4
III	Polymer processing techniques such as extrusion, compression and transfer moulding.	4
	Injection moulding, blow moulding, thermoforming, rotational moulding, calendaring.	4
IV	Assembly: General Types of Assembly Systems, Molded-In Assembly Systems, Snap-Fit Assembly, Molded-In Threads, Press-Fits, Chemical Bonding Systems, Solvent Welding, Adhesive Bonding, Thermal Welding Methods, Ultrasonic Welding, Vibration Welding,	4
	Spin Welding, Radio Frequency (RF) Welding, Electromagnetic or Induction Welding, Assembly with Fasteners, Bolted Assembly, Threaded Metal Inserts, Self-Tapping Screws, Riveted Assembly, Sheet Metal Nuts, Specialty Plastic Fasteners	4
V	Machining of Plastics: Drilling and Reaming, Thread Tapping, Sawing, Milling, Turning, Grinding and Routing	4
	Finishing and Decorating of Plastics: Painting, Vacuum Metallizing and Sputter Plating, Electroplating, Flame Spraying/Arc Spraying, Hot Stamping	4

6PIU11: METAL CUTTING LAB.

B.Tech. (P&I) 6th Semester
OL+OT+2P

SN	NAME OF EXPERIMENT
1	Find out Chip reduction co-efficient (reciprocal of chip thickness ratio) during single point turning.
2	Forces measurements during orthogonal turning.
3	Estimation of Power required during orthogonal turning.
4	Torque and Thrust measurement during drilling.
5	Forces measurement during plain milling operation.
6	Measurement of Chip tool Interface temperature during turning using thermocouple technique.
7	Exercise involving cylindrical grinding on surface grinding machine.
8	Study the variation of surface roughness with different speed and feed during plain milling operation on flat surface.
9	Study of capstan lathe and its tooling and prepare a tool layout & job as per given drawing.
10	Engrave a profile on given workpiece using EDM machine.
11	Exercises for boring of cylindrical bores and machining of external surfaces coincident with internal bores on boring machine.

6PIU12: INDUSTRIAL ENGINEERING LAB-I

B.Tech. (P&I) 6th Semester
OL+OT+2P

SN	NAME OF EXPERIMENT	CONTACT HOURS
	Case Study on the following:	
1	Work Methods Design	
2	Location Planning	
3	Systematic Layout Planning	
4	Process Control Charts	
5	Productivity	
6	Project Management	
7	Materials Management	
8	Capacity Planning	

6PIU13: OPERATIONS RESEARCH LAB.

B.Tech. (P&I) 6th Semester
OL+OT+2P

Exam Hours: 2

SN	LABORATORY WORK/NAME OF EXPERIMENT
	Solve using software and verify with analytical methods
1	Linear programming problem
2	Assignment problem
3	Transportation problem
4	Integer programming problem
5	Queuing Problem
6	Inventory problem
7	Simulation Problem
8	Replacement Problem
9	Decision Tree
10	Game theory

Handwritten signatures and scribbles at the bottom of the page.

6PIU14: STATISTICAL LAB.

B.Tech. (P&I) 6th Semester
OL+OT+2P

SN	LABORATORY WORK/NAME OF EXPERIMENT
Solve using software and verify with analytical methods	
1	Hypothesis Testing <ul style="list-style-type: none"> • Mean: One-Sample z-test, Two-sample z-test, One-Sample t-test, Two-Sample t-test, Paired t-test, Poisson test with Bonferroni, Dunn-Sidak adjustments • Variance: Single Variance, Equality of Two Variances, Equality of Several Variances • Correlation: Zero Correlation, Specific Correlation, Equality of Two Correlations • Proportion: Single Proportion, Equality of Two Proportions • Appropriate Quick Graphs • Resampling – Bootstrap, without replacement, Jackknife
2	Descriptive Statistics <ul style="list-style-type: none"> • Coefficient of variation, std err of mean • Adjustable confidence intervals of mean • Skewness, kurtosis, including standard errors
3	Design of Experiments <ul style="list-style-type: none"> • Complete and incomplete factorial designs • Latin square designs, 3-12 levels per factor • Box and Hunter 2-level incomplete designs • Taguchi designs
4	ANOVA <ul style="list-style-type: none"> • Designs: unbalanced, randomized block, complete block, fractional factorial, mixed model, nested, split plot, Latin square, crossover and change over, • ANCOVA • Means model for missing cells designs • Repeated measures: one-way, two or more factors, three or more factors • Options to test normality and homoscedasticity assumptions • Type I, II and III sums of squares
5	Time Series <ul style="list-style-type: none"> • Smoothing: LOWESS, moving average, running median, and exponential • Seasonal adjustment • Fourier and inverse Fourier transforms • Box-Jenkins ARIMA model • Specify autoregressive, difference and moving average parameters • Forecast and standard errors

Handwritten signatures and scribbles

7PIU1: METAL FORMING PROCESSES

**B.Tech. (P&I) 7th semester
3L+OT**

Unit	Contents	Contact hours
I	FUNDAMENTALS OF METAL FORMING Classification of forming processes, Mechanics of metal working, Flow stress determination, Temperature in metal working, strain rate effects, metallurgical structures, deformation zone theory, hydrostatic pressure, residual stresses, Spring back	3
	Review of state of stress – Components of stress, behavior of metal when subjected to stress, Introduction to stress tensor, principal stresses, Stress deviator, Mohr's circle of stress (two dimension and three dimensions), Mohr's circle of strain, von-mises, Tresca yield criteria.	5
II	FORGING: Classification, equipment, forging in plain strain, open-die forging, closed-die forging, calculation of forging loads in closed-die forging, forging defects, powder metallurgy forging, residual stresses in forging.	4
	ROLLING: Classification, Rolling mills, hot and cold rolling, rolling of bars and shapes, forces and geometrical relationships, simplified analysis of rolling load: rolling variables, Problems and defects in rolled products, theories of cold and hot rolling, torque and power.	4
III	EXTRUSION: Classification of extrusion processes, equipment, hot extrusion, deformation, lubrication and defects in extrusion, analysis of the extrusion process, cold extrusion and cold forming, hydrostatic extrusion, extrusion of tubing, influence of friction, extrusion force calculation, production of seamless pipe and tubing.	4
	DRAWING OF RODS, WIRES AND TUBES; Introduction, rod and wiredrawing, analysis of wiredrawing, tube-drawing processes, analysis of tube drawing, residual stresses in rod, wire, and tubes, defects, Tube drawing and sinking processes, Tube bending.	4
IV	SHEET METAL FORMING: Classification – conventional and HERF processes – presses – types and selection of Presses, forming limit criteria, Limiting Draw ratio - processes: Deep drawing,	3
	spinning, stretch forming, plate bending, Rubber pad forming, bulging, Explosion forming, electro hydraulic forming, Magnetic pulse forming.	5
V	RECENT ADVANCES: Super plastic forming – Electro forming – fine blanking – Hydro forming – Peen forming – LASER Forming –	4
	Micro forming - P/M forging – Isothermal forging – high speed hot forging – near net shape forming, high velocity extrusion – CAD and CAM in forming	4

7PIU2: OPERATIONS PLANNING AND CONTROL

B.Tech. (P&I) 7th semester
3L+0T

UNIT	CONTENTS	CONTACT HOURS
I	Introduction to operations management (OM), the scope of OM; Historical evolution of OM; Trends in business; the management process. Operations Strategy, Competitiveness and Productivity	3
	Demand Forecasting: components of forecasting demand, Approaches to forecasting: forecasts based on judgment and opinion, Time series data. Associative forecasting techniques, Accuracy and control of forecasts, Selection of forecasting technique.	4
II	Product and Service design, Process selection, Process types, Product and process matrix, Process analysis.	3
	Capacity Planning: Defining and measuring capacity, determinants of effective capacity, capacity strategy, steps in capacity planning process, determining capacity requirements, Capacity alternatives, Evaluation of alternatives; Cost-Volume analysis.	2
III	Planning levels: long range, Intermediate range and Short range planning, Aggregate planning: Objective, Strategies, and techniques of aggregate planning.	4
	Master scheduling; Bill of materials, MRP; inputs processing and outputs, and overview of MRPII, use of MRP to assist in planning capacity requirements, Introduction to ERP	4
IV	Production Control: Capacity control and priority control, production control functions; Routing, scheduling, dispatching, expediting and follow up. Techniques of production control in job shop production, batch production and mass production systems. sequencing: priority rules, sequencing jobs through two work centers, scheduling services	4
	Introduction to Just-in-time (JIT) and Lean Operations: JIT production, JIT scheduling, synchronous production, Lean operations system	4
V	Supply Chain Management (SCM): Need of SCM, Bullwhip effect, Elements of SCM, Logistics steps in creating effective supply chain, Purchasing and supplied management.	3
	Project Management: Nature of projects, project life cycle, Work breakdown structure, PERT and CPM, Time-Cost trade-offs: Crashing. Resource allocation, leveling	5

7PIU4: COMPUTER INTEGRATED MANUFACTURING

**B.Tech. (P&I) 7th semester
3L+0T**

UNIT	CONTENTS	CONTACT HOURS
I	Introduction to CIM: Overview of Production Systems, the product cycle, Automation in Production Systems, computer's role in manufacturing, sources and types of data used in manufacturing. The Beginning of CAM: Historical Background,	2
	Introduction to manufacturing System, Classification of manufacturing system, overview of classification scheme, manufacturing progress functions.	3
II	Computer Aided Process Planning (CAPP): Traditional Process Planning, Retrieval process planning system, Generative Process Planning, Machinability data systems, computer generated time standards.	8
III	Group Technology (GT): Introduction, part families, part classification and coding, coding system and machining cells. Introduction to Product data Management System (PDM)	4
	Computer Aided Production Management Systems (CAPM): Introduction to computer aided PPC, Introduction to computer aided inventory management, manufacturing resource planning (MRPII), computer process monitoring and shop floor control, and computer process control.	5
IV	Computer Aided Quality Control (CAQ); Computer in quality control, Off-Line and On-Line Quality control, Automated inspection, contact inspection methods, Non contact inspection methods: optical and non optical computer aided testing. Overview of automatic identification methods.	5
	Flexible manufacturing systems (FMS). Types of FMS, Flexibility in manufacturing, FMS components, FMS applications and benefits.	4
V	Product Design and CAD/CAM in the production system: Introductory concepts Product design and CAD, CAM, CAD/CAM and CIM	4
	Collaborative Engineering; Introduction, Faster Design throughput, Web based design, Changing design approaches, extended enterprises, concurrent engineering, Agile and lean manufacturing.	5

7PIU5.1: MODELING AND SIMULATION

B.Tech. (P&I) 7th semester
3L+0T

UNIT	CONTENTS	CONTACT HOURS
I	Physical modeling : Concept of system and environment, continuous and discrete system, linear and nonlinear system, stochastic activities, static and dynamic models, principles used in modeling, Basic simulation modeling,	4
	Role of simulation in model evaluation and studies, Advantages and Disadvantages of simulation. Modeling of Systems, iconic analog. Mathematical Modeling	4
II	Computer system simulation: Technique of simulation, Monte Carlo method, experimental nature of simulation, numerical computation techniques, continuous system models, analog and hybrid simulation, feedback systems,	4
	Buildings simulation models of waiting line system, Job shop, material handling and flexible manufacturing systems	4
III	Probability concepts in simulation: Stochastic variables, discrete and continuous probability functions, random numbers, generation of random numbers,	4
	Variance reduction techniques, Determination of the length of simulation runs, Output analysis.	4
IV	System dynamics modelling: Identification of problem situation, preparation of causal loop diagrams and flow diagrams, equation writing, level and rate relationship.	5
	Simulation of system dynamics model.	3
V	Verification and validation: Design of simulation experiments, validation of experimental models, testing and analysis.	4
	Simulation languages comparison and selection, study of SIMULA, DYNAMO, STELLA, POWERSIM. Simulation softwares.	4
TOTAL		40

7PIU5.2: SUPPLY CHAIN MANAGEMENT

B.Tech. (P&I) 7th semester
3L+0T

Contents	Contact Hours
Introduction to Supply Chain Management: Supply chain – objectives – importance – decision phases – process view – competitive and supply chain strategies – achieving strategic fit – supply chain drivers – obstacles – framework – facilities – inventory – transportation – information – sourcing -pricing	7
Designing the supply chain Network: Designing the distribution network – role of distribution – factors influencing distribution – design options – e-business and its impact – distribution networks in practice design in the supply chain – role of network – factors affecting the network design decisions	4
Designing and planning for transportation network: Role of transportation - modes and their performance – transportation infrastructure and policies - design options and their trade-offs – Tailored transportation.	4
Sourcing & pricing Sourcing – In-house or Outsource – 3rd and 4th PLs – supplier scoring and assessment, selection – design collaboration – procurement process – sourcing planning and analysis. Pricing and revenue management for multiple customers, perishable products, seasonal demand, bulk and spot contract.	4
Dimensions of Logistics: Introduction, Nature and Concepts, Evolution; Supply Chain Management, Logistical Mission and Objectives; Components and Functions of Logistics Management; Integrated Logistics Management; Key Distribution-Related issues and Challenges and Strategic Logistics Management; Total Cost Analysis and Trade-off	3
Inventory Management: Introduction, Concept, types, Functions; Elements of Inventory Costs; Inventory Management under certainty, Managing Finished Products Inventory under Uncertainty, Strategic Inventory Management Tools and Techniques; Distribution Requirement Planning.	3
Supply Chain Integration: Introduction – push, pull and push-pull systems – push – based supply chains – pull – based supply chain – push-pull supply chain - identifying the appropriate supply chain strategy – implementing a push-pull strategy – demand – driven – strategies – the impact of the internet on supply chain	3
Strategies: distribution strategies – direct shipment – cross docking – trans shipment – centralized versus decentralized control – central versus local facilities.	
Decision-support systems for supply chain management: Introduction – the challenges of modeling – structure of decision support systems – input data – analytical tools – presentation tools – supply chain decision – support systems.

7PIU5.3: RAPID PROTOTYPING

B.Tech. (P&I) 7th semester

3L+0T

Contents	Contact Hours
Overview of Rapid Product Development (RPD). Product Development Cycle;	3
Definition of RPD; Components of RPD. Rapid Prototyping (RP);Principle of RP; Technologies and their classifications;	4
Selection of RP process; Issues in RP; Emerging trends.	4
Rapid Tooling (RT);Introduction to RT, Indirect RT process-Silicon rubber molding, Epoxy tooling, Spray metal tooling and Investment Casting, Direct RT processes-Laminated Tooling, Powder Metallurgy based technologies, Welding based technologies, Direct pattern making (Quick Cast, Full Mold Casting),	4
Emerging Trends in RT, Reverse Engineering: Geometric data acquisition,3D reconstruction, Applications and Case Studies, Engineering applications, Medical applications.	3
Processing Polyhedral Data: Polyhedral BRep modeling, STL format, Defects and repair of STL files,	3
Overview of the algorithms required for RP&T and Reverse Engineering-slicing, support generation, feature recognition etc.	3
TOTAL	40

7PIU11: METAL FORMING AND TOOL DESIGN LAB.

B.Tech. (P&I) 7th Semester

SN	NAME OF EXPERIMENT
Perform any ten experiments from the list given below	
1	Study of the effect of clearance and shear angle on the blanking and piercing operations
2	To determine the effect of percentage of reduction and the semi-cone angle of the die on the drawing load.
3	To find the effect of percentage of reduction and the die geometry on extruding force.
4	Experimental determination of wire drawing force for wire drawing operation.
5	Study of the drop forging operation (flowability, forging load etc by plasticine model.
6	To determine roll load in the sheet rolling process.
7	Students will be given at least one practical problem regarding the design and fabrication of Jigs & Fixture or Press tool.
8	Working drawings of the following:- Drilling Jigs (Box type, Leaf type, Indexing type, Trunion type etc.), Milling Fixtures, Grinding fixtures, Assembly and welding fixtures (for automobile components and frames etc.), Drawing Dies, Bending Dies, Compound Dies, Combination Dies & Progressive Dies.
9	Determination of true stress true strain relationship.
10	To mount die assembly on power press and produce the desired blanks.
11	To mount forming die assembly and to form a cup of M S Sheet.
12	Study of sheet gauges and sheet metal working machines and preparing a funnel using shear, circle cutting machine, ending rollers and spot wring machine.
13	Determine the drawing force component during wire drawing operation using wire drawing dynamometer.

7PIU12: CIMS Lab(CAM, IE & SIMULATION Practicals)

B.Tech. (P&I) 7th Semester

SN	NAME OF EXPERIMENT
1	To prepare part programming for plain turning operation.
2	To prepare part program for turning operations using turning cycle.
3	To prepare part program for threading operation.
4	To prepare part program for gear cutting using mill cycle.
5	To prepare part program for multiple drilling in X and Z axis using drilling cycle.
	Case Study on the following:
1	Work Methods Design
2	Process Control Charts
3	Materials Management
4	Capacity Planning
	Simulation experiments
1	Generate Pseudo Random No. using different Techniques
2	Develop an Analytical Model for a given physical system
3	Develop a Monte-Carlo Simulation Model for a given physical system
4	Find a area of an irregular 2-D shape using Monte-Carlo Simulation
5	Find the effectiveness of simulation on a physical Stochastic System
6	Develop an algorithm for a selected Simulated Study and write the program in a high level language.
7	Modeling of manufacturing system using simulation software such as ARENA

Handwritten signatures and initials are present across the bottom of the page, including a signature that appears to read "Anil K. Mathus".

SPIU1.1: NEW ENTERPRISE AND INNOVATION MANAGEMENT

B.Tech. (P&I) 8th semester

3L+0T

Unit	CONTENTS	Contact Hours
I	Entrepreneurship: Entrepreneurship and enterprise: Concept, role in economic development. Entrepreneurial competencies: awareness, assessment and development. Simulation exercise on goal setting in entrepreneurship. Entrepreneurial & Intrapreneurial mind. International entrepreneurship opportunities. Starting the venture: Generating business idea – sources of new ideas, methods of generating ideas, creative problem solving, opportunity recognition; environmental scanning, competitor and industry analysis; feasibility study – market feasibility, technical/operational feasibility, financial feasibility.	8
II	Business Plan: Emerging Business Opportunities-sources & assessment. Business Plan: Concepts, Methods, analysis & interpretation. Functional plans: Marketing plan – marketing research for the new venture, steps in preparing marketing plan, contingency planning; organizational plan – form of ownership, designing organization structure, job design, manpower planning; Financial plan: cash budget, working capital, proforma income Statement, proforma cash flow, proforma balance sheet, break even analysis.	7
III	Sources of finance: Sources of external finance, short term as well as long term, Debt or equity financing, commercial banks, venture capital; financial institutions supporting entrepreneurs; legal issues –intellectual property rights patents, trade marks, copy rights, trade secrets, licensing; franchising.	8
IV	Start Up: Institutional support to start up and incentives for SSI. Statutory obligation in starting a unit (general like Income Tax, VAT, CST or GST, Service tax, excise and customs, labour laws, etc. Start up strategies. Dealing with outside agencies like consultant, contractors, etc. Key marketing issue of new venture. Starting a franchising business. Starting an e-commerce venture. Buying arunning business. Managing growing venture: Growth, objective and strategy. Managing growth. Assessing resource from external sources, for financing growth including public issue, merger, amalgamation, joint venture, collaboration & selling business.	8
V	Innovation Management: an introduction, organizational setups that facilitate innovations. Management of research and development. Strategic alliances and network. Incubators and Accelerators.	7

SPIU1.2: ENGINEERING OPTIMIZATION

B.Tech. (P&I) 8th semester

3L+0T

UNIT	CONTENTS	CONTACT HOURS
I	Introduction- Engineering Applications of Optimization-Statement of an Optimization Problem-Classification of Optimization Problems-Optimization Techniques	5
II	Classical Optimization Techniques -Single-Variable Optimization-Multi variable Optimization with No Constraints-Multivariable Optimization with Equality Constraints- Multivariable Optimization with Inequality Constraints- Transportation	4
III	Nonlinear Programming I: 1D Minimization Methods-Unimodal Function, Elimination Methods-Unrestricted Search, Exhaustive, Dichotomous Search- Interval Halving Method- Fibonacci Method-Golden Section Method, Interpolation Methods-Quadratic, Cubic Interpolation Method - Direct Root Methods-Newton Method-Quasi-Newton, Secant Method	7
IV	Nonlinear Programming II: Unconstrained Optimization Techniques- Direct Search Methods- Indirect Search (Descent) Methods, Non-linear Programming III: Constrained Optimization Techniques- Direct Methods-Indirect Methods, Geometric Programming, Dynamic Programming, Integer Programming -Integer Linear Programming - Stochastic Programming.	4
V	Modern Methods of Optimization- Genetic Algorithms-Simulated Annealing-Particle Swarm Optimization- AntColony Optimization-Optimization of Fuzzy Systems- Neural- Network- Based Optimization, Practical Aspects of Optimization	4
TOTAL		40

SPIU2.1: PRODUCT DEVELOPMENT AND LAUNCHING

B.Tech. (P&I) 8th semester

3L+0T

Unit	Contents	Contact Hours
I	Importance of New Product: Definition-importance-Development Process, Importance of new product for growth of enterprise, Definition of product and new product,	2
	Responsibility for new product development, Demands on product development team, Classification of products from new product development point of view- Need based/Market pull products, Tech. push, Platform based, Process based and customized products,	3
	New product development process and organization, Generic product development process for Market Pull Products, Modification of this process for other types of products.	3
II	Need Analysis: Problem Formulation Establishing economic existence of need, Need Identification and Analysis, Engineering Statement of Problem, Establishing Target Specification.	8
III	Generation of Alternatives and Concept Selection: Concept generation-a creative process, Creativity, Road Elects to creative thinking-Fear of criticism and Psychological set,	4
	Tools of creativity like brain storming, Analogy, Inversion etc., Creative thinking Process, Concept feasibility and Concept Selection, Establishing Engineering Specification of Products.	4
IV	Preliminary and Detailed Design: Design Review Preliminary design-Identification of subsystems, Subsystem specifications, Compatibility, Detailed design of subsystems, component design,	6
	Preparation of assembly drawings, Review of product design from point of view of Manufacturing, Ergonomics and aesthetics.	2
V	Management of New Product: Development and Launch New Product Management's Challenges, Maintaining focus, Promotion of Right Culture, Management of Creativity, Top Management attention, Design Team Staffing and Organization, Setting key mile stone, Identification of Risk Areas, Project Execution and Evaluation Product Launch Strategies,	8

SPIU2.2: MECHATRONICS AND MEMS

B.Tech. (P&I) 8th semester
3L+1T

Unit	CONTENTS	Contact Hours
I	Overview of Mechatronics: Historical perspective, Definition, Applications, Block diagram of Mechatronic system, Functions of Mechatronics Systems, Systems Engineering, Verification Vs Validation, Benefits of mechatronics in manufacturing	2
	Electrical and Electronic Systems: Electrical circuits and Kirchhoff's laws, Network Theorems and AC circuit Analysis, Transformers, Analog Devices, Signal Conditioning, Digital Electronics, Data Acquisition systems.	3
II	Modeling, Analysis and Control of Physical Systems: Basics of System Modeling: LTI and LTV systems, Need for modeling, Types of modeling, Steps in modeling, Building blocks of models, Modelling of one and two degrees of freedom systems, Modeling of Electro-mechanical systems, Mechanical Systems, Fluid systems, Thermal systems; Dynamic Responses, System Transfer Functions, State Space Analysis and System Properties, Stability Analysis using Root Locus Method, Stability Analysis using Bode Plots, PID Controllers (with and without Time Delay)	3
III	Sensors and Actuators: Static characteristics of sensors and actuators, Position, Displacement and Proximity Sensors, Force and torque sensors, Pressure sensors, Flow sensors, Temperature sensors, Acceleration sensors, Level sensors, Light sensors, Smart material sensors, Micro and Nano sensors, Selection criteria for sensors, Actuators: Electrical Actuators (Solenoids, Relays, Diodes, Thyristors, Triacs, BJT, FET, DC motor, Servo motor, BLDC motor, AC motor, Stepper motors), Hydraulic and Pneumatic actuators, Design of Hydraulic and Pneumatic circuits, Piezoelectric actuators, Shape memory alloys.	4
IV	Microprocessors, Microcontrollers and Programmable Logic Controllers: Logic Concepts and Design, System Interfaces, Communication and Computer Networks, Fault Analysis in Mechatronic Systems, Synchronous and Asynchronous Sequential Systems, Architecture, Microcontrollers, Programmable Logic Controllers (PLCs): Architecture, Number Systems Basics of PLC Programming, Logics, Timers and Counters, Application on real time industrial automation systems.	5
V	Micro-Electro Mechanical Systems (MEMS): History, Effect of scaling, Fabrication techniques: Oxidation, Sputter disposition, CVD, Lithography, Etching, Wafer bonding, LIGA, DRIE, Applications: Lab on chip	5
	Case Studies: Design of pick and place robot, Car engine management system, Automated manufacturing system, Automatic camera, Automatic parking system, Safety devices and systems.	3

8PIU3.1: NON DESTRUCTIVE EVALUATION AND TESTING

B.Tech. (P&I) 8th semester
3L+0T

UNIT	CONTENTS	CONTACT HOURS
I	Introduction: An Overview, Factors influencing the Reliability of NDE, Defects in materials, Defects in composites. NDT methods used for evaluation of materials and composites.	3
	Visual Inspection: Basic Principle and Applications.	2
	Liquid Penetrant Testing: Principle, Procedure and Test Parameters, Materials, Limitations and Applications.	3
II	Radiographic Inspection: Principles of X – ray radiography, equipment, Absorption, Scattering, X-ray film processing, General radiographic procedures, Reading and Interpretation of Radiographs, Industrial radiographic practice, Limitations and Applications, Welding defects detection. Gamma ray radiography.	8
III	Ultrasonic Testing: Principle of wave propagation, Ultrasonic equipment, Variables affecting an ultrasound test, Basic methods: Pulse Echo and Through Transmission, Types of scanning.	5
	Applications of UT: Testing of products, Welding Inspection, Tube Inspection, Thickness Measurement, Elastic Constant Determination, Ultrasonic testing of composites.	3
IV	Magnetic Particle Inspection: Methods of generating magnetic field, Demagnetization of materials, Magnetic particle test: Principle, Test Equipment and Procedure, Interpretation and evaluation.	5
	Introduction to Acoustic Emission Testing and Thermography.	3
V	Eddy Current Testing: Principle of eddy current, Factors affecting eddy currents, Test system and test arrangement, Standardization and calibration, Application and effectiveness.	5
	Comparison and Selection of NDT Methods, Codes and Standards	3

8PIU3.2: FUEL CELL AND HYBRID ENGINE TECHNOLOGY

B.Tech. (P&I) 8th semester

UNIT	CONTENTS	CONTACT HOURS
I	Introduction and types of Fuel cell: Introduction : the rational behind fuel cell development, basic principle of fuel cell, operational of fuel cell, efficiency of fuel cell, co generation of heat and power, important reaction such as hydrogen oxidation, methonal oxidation etc	3
	Types of fuel cell: DMFC (direct methanol fuel cell),PAFC (phosphoric acid fuel cells), MCFC (molten carbonate fuel cells), SOFC (solid oxide fuel cells)	4
II	Fuel processing and application of fuel cells: Fuel processing- general, producing hydrogen from alcohol, producing hydrogen from hydrocarbon, hydrogen from other sources, Gas cleanup, reformer system, hydrogen storage system Engineering	6
III	fuel cell engineering, vehicle cell design, stack engineering fuel processing system application: stationary power, propulsion of vehicle, portable application	4
	Electric Vehicle: Introduction, working. Electric car motors, electric car batteries, charging system of electric car, magna charge system. conversion system for transmission.	6
IV	Hybrid vehicle: Introduction, working. Power split devices. Hybrid car performance, gasoline hybrid structure. Gasoline Vs electric power	6
	Transmission components of hybrid vehicle. Advantage and limitation. Different types of hybrid vehicle.	4
V	Solar Vehicles: Introduction and working, photovoltaic cell, solar cell. Energy lose in solar cell. Solar powering house. Solar cost, anatomy of solar cells	7
